

Join us and share your thoughts on direct care and behavioral health workforce challenges!

The Michigan Department of Health and Human Services wants to better understand the challenges of people who work in or receive care from direct care and behavioral health services.

We want to hear what you have to say. In May, there will be seven feedback sessions around the state. These sessions will focus on identifying unique regional challenges and considering possible solutions to address those challenges.

Use the camera on your phone to frame and view the QR code or visit pscinc.co/workforce to register for a regional feedback session and share your perspective.
